

Bonilla Specs and Benefits:

- Made from UHMW plastic
- Angled and tapered to follow the contour of the furrow
- Prevents the seed from bouncing by holding it firmly against the bottom of the furrow
- Available for John Deere 50,60, and 90 series drills
- Available for Case IH PD500 drills

Seed Boot Specs and Benefits:

- Seed boot stabilizer
- Simple to install
- No drilling or machining required
- Precision machined and hardened
- Fits John Deere 50,60, and 90 series drills
- Stops the up and down movement of the seed boot and is able to keep a consistent furrow because the seed boot is tight and in the proper position
- Stops the seed boot from bouncing which in turn stops erratic seed placement and improper wear on the seed boot

Keep a consistent furrow

Bonilla Seed Guide & Seed Boot Stabilizer

Making Every Seed Count

By using the Bonilla Seed Guide and the Seed Boot Stabilizer together, we are able to gently guide the seed to the bottom of the furrow resulting in a more uniform stand due to enhanced placement and uniformity.

Testimonials

*"We were very impressed with how easy it was to install.
More importantly our seed placement was dramatically better"*
Lakeview Colony Lake Andes, SD
