Introduction

BUILT FOR PRODUCERS. BACKED BY INNOVATION.

At Pillar, we're committed to building durable, efficient, and high performing seeding equipment designed to meet the real-world needs of producers.

From our precision openers to our heavy-duty toolbars and our **all new** Air Cart, every product is engineered for reliability, simplicity, and top tier results in the field.

Proudly built in Saskatchewan.

Pillar is seeding equipment you can count on!

DH Series Drill

About Us

BUILT FOR PRECISION AND PERFORMANCE

Dick Friesen, John Marten & Bill Froese

SF Series Drill

**PX Series
Harrow**

With deep roots in the ag industry, the owners opened Pillar Lasers as a fabrication shop focused on Agriculture. Beginning with the invention of our first opener, the Pillar MKI, with superior performance and abilities compared to the competition, we wasted no time retrofitting them to drills across the prairies.

The success of the MKI led us to being able to debut our own toolbar, the DH Series, with the improved Mark II Opener then to the current Mark III opener which we still offer to this day as the backbone of our product line, known for its robust design and low maintenance.

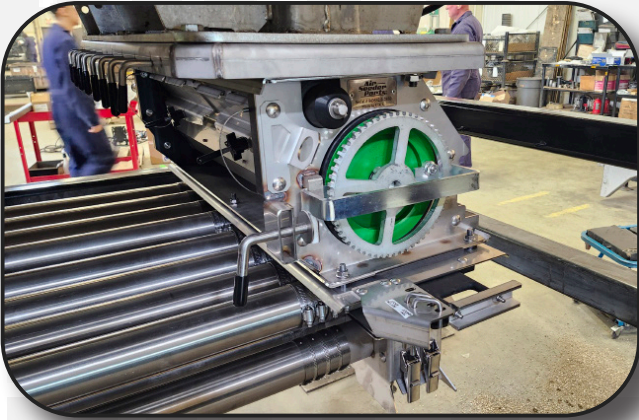

Our continued growth in the industry has led to the invention of a whole product line proudly displaying the Pillar name.

At Pillar our goal has always been to build the highest quality implements with the lowest maintenance possible along with exceptional service to keep you in the field when it matters most.

Small Seeds Tank

SMALL SEEDS GOT ITS OWN SUITE

A separate stainless tank ensures accurate rates and easy clean out for fine seeds like canola.

Metering System

BUILT TO METER MORE

Proven durable and efficient, the meter system handles a wide range of products without skipping a beat.

Hydraulic Jack

SAVE YOUR STRENGTH

Our hydraulic jack does the heavy lifting, so you don't have to.

MS Series Cart

TBT & TBH

Platform

SKID-SIZED CONVIENIENCE

The large platform can handle a full skid of product, making refills faster and keeping you in the field longer.

Fans

FAN-TASTIC PERFORMANCE

High capacity fans deliver consistent air flow to keep product moving smoothly- no blockages, no delays.

Modular

- Tow Between
- Rear Tank 1
- 350 or 500
- Tank 2
- 120,170,260
- Tank 3
- 120,170,260
- Tank 4
- 60,120,170

Systems

- Tow Behind
- Rear Tank 1
- 350 or 500
- Tank 2
- 120,170,260
- Tank 3
- 120,170,260,350,500
- Tank 4
- 60,120,170,260

Cleaner Wheel

CLEAN CUT EVERY PASS

Prevents build up on the disc to slice through residue even in wet conditions and helps to control soil disturbance.

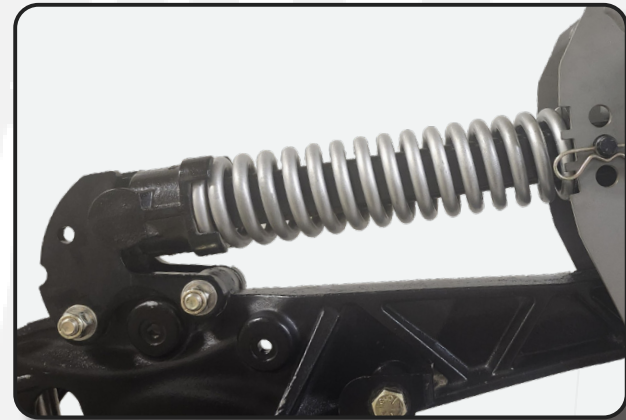

MKIII Opener

Packer Wheel

KNOW THE STARTING POINT

Closes the furrow right behind the disc with adjustable pressure for firm seed to soil contact and consistent emergence.

Spring Down Pressure

SIMPLICITY MEETS PERFORMANCE

Easily adjust down pressure with no tools or hydraulics. Just set it and go.

Seed Boot

PLACED RIGHT, GROWN RIGHT

The Pillar seed boot delivers accurate seed to soil contact and is built tough for season after season of performance.

Stainless Steel Tubes

NO RUST, NO FUSS

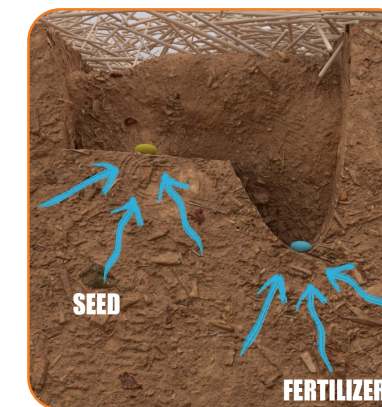

Corrosion-resistant stainless steel means your tubes stay clean, precise and low maintenance.

Disc

DUAL ANGLE EFFICIENCY

Engineered for precision, the compound angle disc slices through residue and soil with minimal disturbance for ideal trench and input placement.

EXSEED WITH PILLAR!

***Every year when I'm seeding
pea stubble I say I can never
get rid of my Pillar.***

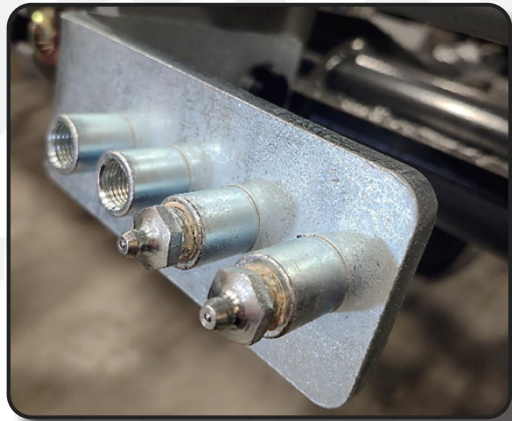

It does such a great job!

Jerome (Crooked Creek, AB)

Walking Beam

GROUND CONTROL

The DH Series walking beam delivers consistent opener depth and a smoother ride across tough terrain.

Grease Banks

EASY ACCESS, LESS HASSLE

Front mounted grease banks mean quicker maintenance and less crawling around to save time (and your knees).

DH Series Drill

TBT & TBH

Weight Transfer

BUILT TO ROLL WITH IT

Even in uneven or soft ground, the DH Series' weight transfer maintains opener pressure across the width of the machine. NO over or under seeding.

Depth Shims

TOOL FREE DEPTH CONTROL

Easily fine tune your seeding depth without a wrench in sight. Our no tools system makes in field adjustments quick, consistent and hassle free.

Available Sizes
30', 40', 50', 60'

Accessible Air

SERVICE WITHOUT THE STRUGGLE

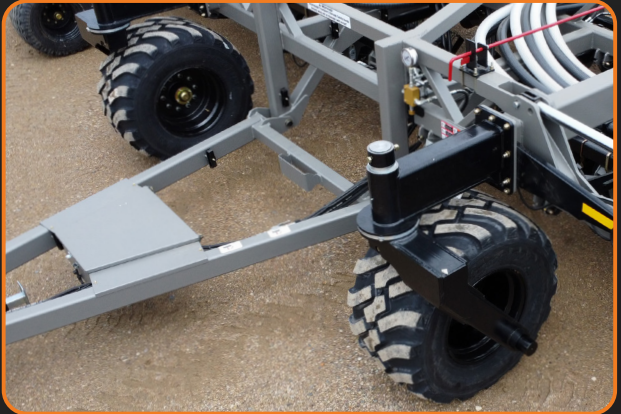

The air pack is mounted in a convenient, easy to reach location, so regular checks and service are quick and hassle free.

Big Wheel Kit

GO BIG

The larger diameter wheels provide improved ground clearance and flotation, minimize soil disturbance and enhancing performance in soft or uneven terrain.

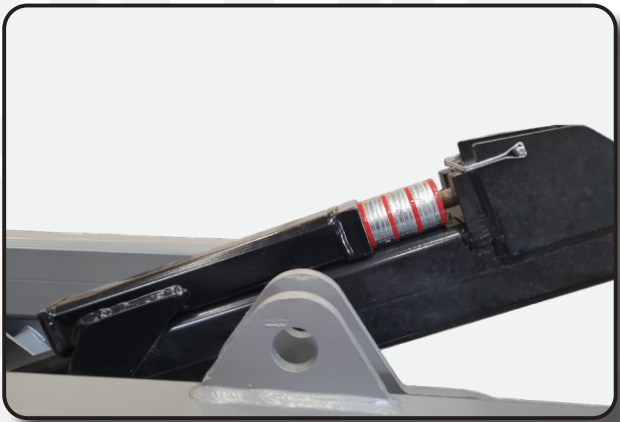

"In 2016, we had a heavy, snow-packed wheat crop we couldn't pick up in spring—but the Pillar discs cut through it clean with no pushing or plugging at all."

Darrell (Outlook, SK)

Depth Shims

SIMPLE SHIM SYSTEM

Adjusting seeding depth is fast and easy with our sliding shim design, no tools requires, no wasted time.

SF Series Drill

TBT & TBH

Weight Distribution

DESIGNED TO STAY GROUNDED

The SF Series is engineered for even wight distribution. From Front to back and side to side. Delivering improved ground following, frame stability, and reduced compaction across all terrain.

Accessibility

SERVICE MADE SIMPLE

Quick and easy access to each opener means less time wrenching and more time seeding.

Narrow Transport

ROAD READY DESIGN

The SF Series folds up to a narrow transport width, making moves between fields safer and easier, even on tight gravel roads.

Extremely Flexible

FLEX THAT WORKS

The SF Series drill is built to move with your land. Contouring over hills, dips and everything in between for accurate seed placement and consistent emergence.

Rear Steering

SMART STEERING FOR TIGHT SPOTS

The rear steering system keeps the rig nimble, making tight turns and narrow approaches a breeze, even with the full setup in tow.

Available Sizes 61' & 71'

The Pillar opener is a very cost effective way of placing seed and fertilizer accurately in the soil in ideal and less than ideal moisture and residue conditions.

Andy (Hilda, AB)

Hydraulic Tine Adjustment

DIAL IN ON THE GO

Hydraulic tine adjustment lets you fine tune aggressiveness without leaving the cab, quick, smooth and simple.

Solid Draw Tubes

STRENGTH WHERE IT COUNTS

Designed to handle high stress and hard pulls. These solid tubes keep your harrow aligned and reliable.

Level Gauge

ALWAYS ON THE LEVEL

With a built in level gauge, you can fine tune the harrow's frame for even residue management and consistent performance.

Pillar Xtreme PX-7

Available in
5 Bar or 7 Bar

Carbide Tines

BUILT TO OUTLAST THE FIELD

Carbide tips hold their edge longer, reducing downtime and replacement costs while keeping your harrow running strong.

Auto Locking

LOCK IT AND LEAVE IT

Auto locking ensures your equipment is safely secured every time. Fast, simple and reliable.

Hitch Weight

STAYS GROUNDED

With over 1,200 lbs of hitch weight means better transport, smoother field turns, and steady towing from start to finish.

HAVE QUESTIONS?

ON THE CUTTING EDGE OF AGRICULTURE

Experience the Pillar Difference

TOUGH. FAST. PRECISE.

At Pillar, we're committed to providing durable, high-performance agricultural equipment designed to enhance your productivity and efficiency. With our innovative tools like the DH Drill, SF Drill, Heavy Harrow and Air Cart, we deliver solutions that ensure precision, reliability, and long-term value. Elevate your seeding and soil management operations with Pillar's trusted equipment.

JOIN THE PILLAR COMMUNITY

After your Pillar setup is in the ground, the first job's done- now it's time to celebrate! Connect with fellow producers on social media, tag us in your photos, and share the results of your hard work. It's a great way to show off those crops and help other producers make informed decisions.
